

Element eProto for Create I22-10498 \$4.95

The eProto provides a quick and easy method to interface custom electronics to the iRobot Create Command Module.

More Details

The eProto plugs into any of the Command Module's four ePorts. Each of the DB-9 ePort pins are routed to individual solder pads on the board for easy connection. Multiple power and ground pads are provided. A grid of holes on standard 2.54mm (0.1 in) centers provide a small area for building custom circuits.
