

Level Shifter Kit R115-INT-BRD-KIT \$15.00

The RS-232 Level Shifter Kit includes all the needed parts to make our RS-232 Level Shifter Board. This kit is very easy to put together and only requires a soldering iron, solder, a pair of wire clippers and a few minutes of your time.

This kit can be used to create your own BrainStem serial interface cable. It can also be used to interface any TTL serial logic to RS-232 levels.

Assembly Instructions

Assembly instructions can be found on our serial interface kit instruction page.
