

# Custom Code Wheel Spacer R256-CS-040-01 \$2.00

Codewheel mounting system for WheelWatcher codewheel stickers. Used with Nubotics WheelWatcher Encoders.

This spacer allows you to use the codewheel sticker on a variety of wheels. Some drilling is required, but the predrilled guide holes make it simple. Thirty two guide holes are provided which line up with most common servo horns from GWS, Futaba, and Hitec.

#### Compatible With

- O-Wheel
- Reversible Foam Wheel
- Ribbed Rubber Wheel
- Nonstandard wheels

- Articulated mechanisms
- All common servo horns from GWS, Futaba, and Hitec

#### Features

- Self-adhesive backing for easy mounting
- Pre-drilled guide holes provided for you to drill out to provide space for wheel mounting screw heads
- Same size as the Nubotics Codewheel Sticker incremental codewheels used with all WheelWatcher products
