

# Devantech LCD03 R272-LCD03 \$47.00

20 character x 4 line LCD display that has both serial and I2C interfaces.

I2C and serial display driver provides easy operation of a standard 20 x 4 LCD text display. Requires a 5 V power supply and two data connections for either mode. The four-pin connector is for power and an I2C or serial connection. The seven-pin connector provides a convenient interface for a 3x4 keypad.

Specifications	
Supply Voltage	5.0 V
