

8 Channel USB Relay Module R296-USBRLY08 \$91.00

The Devantech RLY08 provides 8 V free contact relay outputs with a current rating of up to 1 A each. It is powered from the USB bus and has a low maximum current consumption of approximately 90 mA. The relays are SPCO (Single Pole Change Over) types. The normally open, normally closed and common pins are all available on the screw terminals.

Installation instructions are available at Devantech technical documentation page. The USB-RLY08 will show up on a Unix based computer as a virtual serial port without the need to install any drivers.
