

Serial Interface Connector S13-SERIAL-INT-CONN \$11.75

This connector conforms to the Acroname Serial Interface Standard and converts serial signal from TTL to RS-232 levels. Included are indicator LED's for host serial power and TTL logic power.

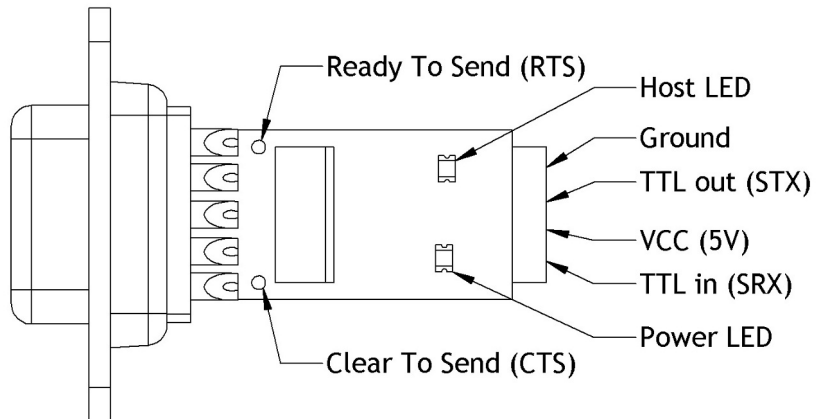

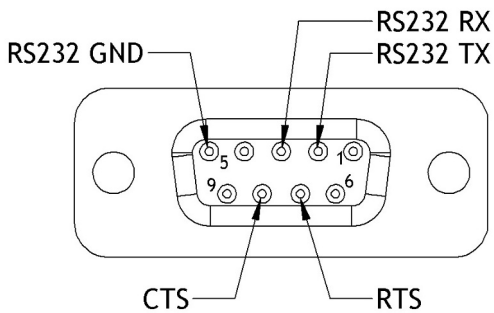

Features

- TTL or CMOS to RS232 level shifter
- 5 V and 3.3 V TTL tolerant
- Standard DB9 female connector
- Conforms to Acroname Serial Interface Standard
- Host connection indicator LED

- Power status LED

CTS/RTS

The CTS and RTS lines are also connected and exposed although not used by the 4-pin BrainStem connector. These can be separately wired for other uses in your application.
